

# COILED TUBING

## COILED TUBING

C&J offers a complete range of coiled tubing services to help customers successfully execute their most demanding horizontal completion, workover and well maintenance projects. Our services allow customers to complete projects quickly and safely across a wide spectrum of pressures, without having to kill or shut in their wells.

C&J operates and maintains the most technically enhanced coiled tubing units, capable of handling heavy-duty jobs in today's most challenging operating environments in basins throughout North America. We meet our customers' needs with two of the largest extended-reach spreads in the industry. Our equipment is purpose-built and maintained in-house.

In close collaboration with our customers, our onsite engineers will develop a detailed project plan to determine the best approach to keep the project on time and on budget. Our crews are some of the most experienced and well trained in the industry. Ready to respond at the customer's call, they are mobilized within the region to supervise and execute projects with uncommon efficiency.

C&J's coiled tubing services are backed by an award-winning safety record and a commitment to service excellence.

### Our Capabilities

- Coiled tubing operating depths up to: 25,000 ft for 1 ¼-in. tubing, 25,000 ft for 2-in. tubing, 25,000 ft for 2 ¾-in., 22,000 ft for 2 ½-in. tubing
- Injector head capability from 1 ¼-in. to 2 ½-in.
