

CENTRAL DISPATCH

TRANSPORTATION SERVICES CUSTOMIZED FOR OPERATIONAL EFFICIENCY

C&J Energy Services is your transportation solution. We provide a logistical infrastructure that drives operational efficiencies for our customers. We utilize state-of-the-art dispatching with communications and billing software that is unique to our industry and customized to fit your specific business needs. Fully integrated invoicing and enterprise solutions complement our full "circle of service" to our customers.

OUR TRANSPORTATION SERVICES INCLUDE:

- 24-7 call center dispatch facility with customer dedicated personnel
- Integrated order entry at time of call
- Electronic job information communication between dispatch and driver
- Job activity time-stamping and storage for real-time monitoring and data analysis
- Customizable KPI reporting based on customers' needs

REAL-TIME TRACKING PROVIDES:

- Job updates via in-cab communications hardware
- GPS location mapping of all operated and rented equipment
- Web-based data portal for customer access

Our professional service agents track deliveries for the most up-to-date status reports and exceptional customer experience. We can inform our customers of the exact location and status of their shipment at any time.

When customers use C&J Energy Services, they can feel confident in excellence delivered, every time.
