

C&J Energy Services

WE DELIVER WHAT OTHERS CAN'T.

C&J Energy Services is one of North America's largest vertically-integrated oilfield services providers, with equipment, facilities and technical expertise distributed across most major oil and gas producing basins in the United States.

CRUDE OIL AND CONDENSATE HAULING SERVICES

WELL SERVICES OPERATIONS

C&J offers extensive fluids hauling experience and is ranked the **#1 fluids hauling provider in the U.S.** We operate a fleet of specialized tractor/trailer units for the transportation of crude and condensate, and have the technical expertise required to meet all your needs including tank gauging, testing and loading. C&J is a recognized leader in our industry for its exceptional safety practices and policies. We are the only Well Services contractor that currently participates in OSHA's Voluntary Protection Program. All of our drivers are subject to our standardized driver training program that incorporates interactive classroom teaching and on-the-road instruction. We utilize GPS enabled vehicle monitoring in all production fleet vehicles for real-time tracking.

Our fluid hauling experience is second to none with more than 9.7 million barrels transported and more than 10 million DOT miles driven.

We pride ourselves by delivering excellence for more than 600 leading operators in the major U.S. basins.

WE ARE C&J.
