

C&J Energy Services

WE DELIVER WHAT OTHERS CAN'T.

In today's market, C&J Energy Services recognizes the desire of operators to invest in projects that are "beyond unconventional." These projects often require precise planning and execution to meet strict return on investment parameters.

By integrating our operations and engineering groups, the Specialized Completions Solutions team provides the answers today's operator needs to deliver what others can't.

Capabilities and Experience:

Proven Experience – A team of seasoned professionals that command the knowledge and experience necessary to provide efficient solutions.

Equipment – Range of equipment including blenders, hydration, C6 – chemical add units, 2,000 HHP pumps and more.

Lab – Capabilities include 19 point water analysis, biocide efficacy analysis and fracturing fluid analysis.

Fleet – Capabilities available for these types of treatments: energized, vertical, recompletions and refracturing, coil-assisted, rig-assisted and crosslinked or slickwater fluid systems.

Solutions Successes:

- General pressure pumping services
- Diversion treatments
 - Extensive experience across multiple basins
- Re-ConSM frac-less re-stimulation
 - Successfully executed in multiple basins
- Matrix acidizing and acid fracturing
 - Gelled and high rate acid treatments
- Recompletions, well remediation, and re-entry treatments
 - Vertical and horizontal wells
- Coil assisted treatments

WE ARE C&J.
