

SPECIAL SERVICES

C&J delivers industry-leading solutions for excavation, mobilization, and plug and abandonment and provides equipment rental services in selected locations. These services complement our comprehensive suite of well construction and completion services available in prominent shale basins across the U.S. and Canada. Our special services include fishing tool rental and services, plug and abandonment, excavation and construction, wellbore cleanout, plug setting and retrieval, tubing conveyed perforating (TCP), drill pipe and tubing rental, pressure and flow control rental, and pipe and downhole tool retrieval.

Supported by our regional in-house service centers, C&J is able to maintain the high level of service excellence that we are known for.
