

SERVICE QUALITY and WELLSITE EFFICIENCY

C&J O-Tex Cementing delivers both.

When you're cementing a well, service quality and wellsite efficiency have a huge impact on your profitability.

Operators across the country trust C&J Energy Services to provide a wide range of cementing services, delivered on time and with an uncompromising level of service quality, efficiency and safety. As one of the most geographically diverse and technologically advanced providers of well construction, well completions and well services in the U.S., we're proud to deliver the expertise, flexibility, facilities and equipment to meet your unique wellsite needs.

Our proprietary cementing systems are engineered to provide exceptional zonal isolation in any environment – including conventional, unconventional, horizontal, high-pressure and high-temperature applications.

CEMENTING SOLID RELATIONSHIPS

#1 CUSTOMER SATISFACTION
RANKING IN THE US
2015, 2016 & 2017

Survey conducted by EnergyPoint Research, an independent research company in the global oil and gas industry.

ADVANCED CEMENTING SYSTEMS

Precise design and thorough testing enable our proprietary cementing systems to meet stringent requirements for fluid loss, free fluid, thickening time and compressive strength.

Our advanced cementing simulation software provides valuable confirmation that each blend is formulated to deliver optimal mud removal and zonal isolation.

CUSTOMIZED CEMENTING PERFORMANCE

When you work with C&J O-Tex Cementing, you're never locked in to expensive, standardized formulations. Using a variety of quality cementing products and additives, our cost-effective cement blends and slurry systems are designed to deliver optimal performance for your individual well conditions.

Each job is customized to provide local, proven solutions to your key technical challenges. Full-service laboratories provide exceptional technical support for each cementing location.

A FULL RANGE OF WELLSITE SERVICES

C&J is one of the most geographically diverse and technologically advanced providers of well construction, well completions and well services in the nation.

We also offer top-tier directional drilling, fracturing, coiled tubing, pumping and other complementary services to maximize the potential of your wells.
